

## System Exhibition of AIAA

It was held in the microwave exhibition from November 10 to 12, 2004 in Pacifico Yokohama.

There is meaning, which shows how the exhibition parts combines in the system.

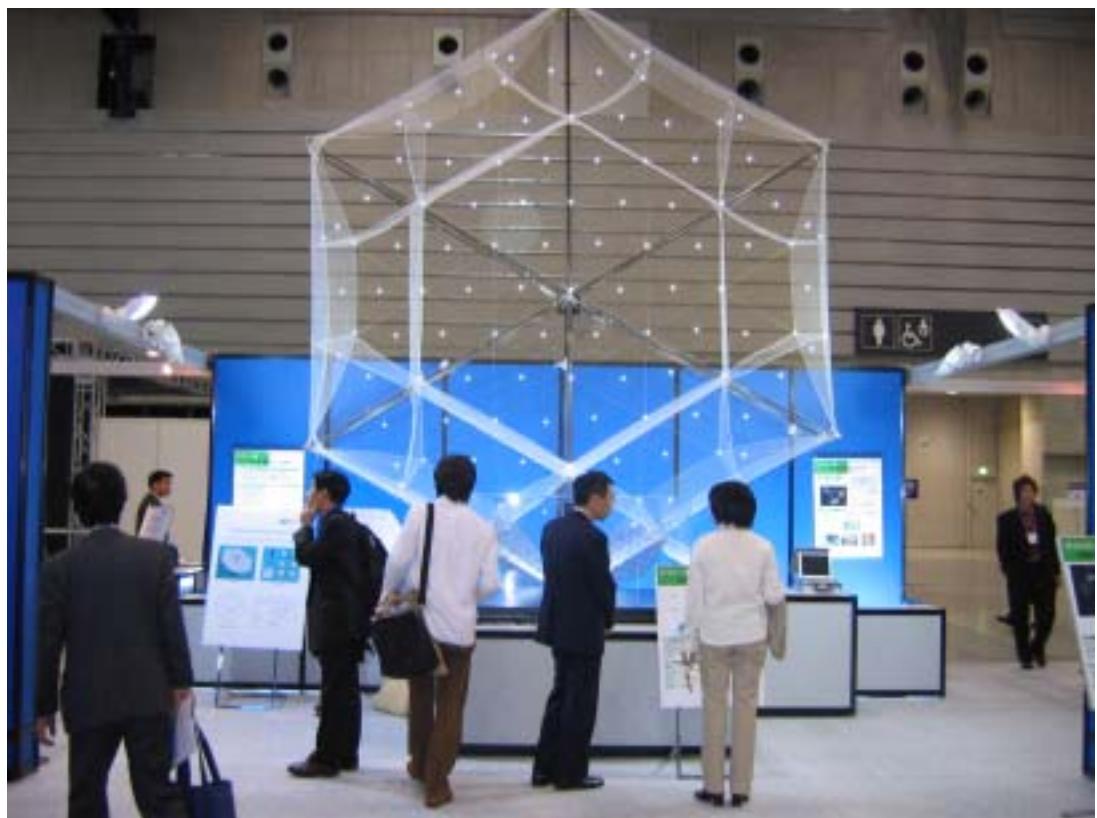

Much people compare with the ordinary year look at exhibition this year.

### Exhibition Things

Japan Aerospace Exploration Agency (JAXA) and National Institute of Information and Communications Technology (NiCT) shows the model of ETS- and deployment antenna parts, ground equipment, the folding antenna, OISETS (Optical Inter-orbit Communications Engineering Test Satellite) and WINDS (Wideband Internetworking Engineering Test and Demonstration Satellite) satellite's model, Quasi zenith satellite's model, stratosphere platform video, etc. were exhibited.

Exhibition scenery: Right Side (OISETS and WINDS satellite's model can be seen)

Exhibition scenery: Front (a part of deployment antennas for ETS- )
