

We can release February/March issue. Although we have decided to upload on time, even March has passed half. Satellite Digital Broadcasting is main topics in this issue and we are waiting for the article from MBCO. Fortunately their satellite has been launched successfully yesterday and they can prepare a wonderful article for us. In Space Japan Club, Mr. Kogure, JAXA Japan, has been responded to our request without any means. I would appreciate the support to AIAA Satellite Communication Forum in succession.
